### Scope and Perspective

The single moment to live, to - carpe diem - should not be - single -. Consciousness of Time and Space should - at any moment - be: Eternity and Infinity

Thinking long-term rather than short-term. Thinking in generations rather than thinking in years or quarters

Thinking globally even when acting locally.

### My Generation's Legacy

I fell into tears when I think about the harm my generation has done to nature.

How could it happen? How could it end up so badly, so harmful? Certainly *Narrowness of scope and perspective* is part of the explanation.

## 2.1 Wisdom Level 2

Tremendous harm has been done to the planet
